

Testing requirements for www.glipped.com

Before Login:

<https://glipped.com> (Landing page)

To be tested:

- Links on all pages
- For broken links
- Not working links
- Grammatical errors / spelling mistakes
- Responsiveness

<https://glipped.com/login.php>

To be tested:

- Login
 - Email address (validation)
 - Password (validation)
- Sign in with google+, facebook and twitter
- Forget your password (email goes to your email account if you're registered)

<https://glipped.com/registration.php>

To be tested:

- Registration with three different account types: Volunteer, nonprofit and corporate - each sends an activation email to user

After Login: COMPANY ACCOUNT

To be tested:

A company admin logs in and wants to get all his employees signed up on Glipped. Click on dashboard and then my network to add other employees to Glipped; either add a single user or

do a bulk activation by downloading the template, filling it up and uploading it again. It will send activation emails to all people on the spreadsheet.

Each of the people who have activated their account should appear in *responded* and who haven't activated their account should appear in *not responded*. Clicking on the send reactivation email button should send emails to those who haven't activated their account yet

<https://glipped.com/profile.php>

To be tested:

Each user can select their skills and causes in their profile based on which the opportunities are sorted in the dashboard under find an event. The events are shown based on the top causes chosen by all employees who were sent activation emails + their skills + the company admin's own skills and causes.

Check if all other details get updates. Also check for data validation

<https://glipped.com/events.php>

Description: This page shows all the volunteering opportunities that are available. There are two kinds of events, introduced events (which we curate from around the web) and organic events which are created on glipped platform. The introduced events have a popup which asks for time and people details on clicking *I'm interested* and the organic events just add the person to the attendee list (which appear in the details of the event).

To be tested:

- Filters:
 - Search for people/events: should show events based on keywords in the title
 - City: San Diego, Los Angeles, San Francisco and Oakland show be searchable
 - Zipcode: Zip codes of these cities should be available
- Traditional and skill based events (buttons) : Traditional events should not have any skills listed in the description. Only skill based events should have skills listed
- Dates: Clicking on dates in the calendar should show all opportunities occurring on that date (older dated events should not appear)
- Clicking on flexible events: shows another set of events with no date and no time - all filters should work for flexible events
- Refresh button: Should refresh the search

Also check if a combination of the above filters is working

- Add to calendar button: Adds the event to google calendar
- Causes and skills (cross/ticks) at the bottom of every picture: If the causes/ skills selected by you or your employees in the profile matches with the opportunity, it'll display a tick

- I'm interested button: Can do two of the following things
 - Either display a popup which asks how many people will attend and a date when you want to attend the event is the date is a date range, filling out details gives an email at info@glipped.com
 - Or it adds you to the attendee list, and when you click on the number of people attending in event details page, it shows who are all attending the event
- Lazy loading: As you keep scrolling, more events begin to appear

On clicking the little plus button on the right bottom corner of every event:

(<https://glipped.com/introduce-event.php?id=somenumber>)

To be tested:

- If event has add to calendar and I'm interested, both
 - Only invite button and a list of people to invite should be there (people whose account is created through the company)
- If event just has I'm interested button then in the event details page, invite and award buttons, both should be there
- Clicking on award or RSVPing to an event gives the nonprofit who created the event (Creator's name) an update as well

After Login: NONPROFIT ACCOUNT

<https://glipped.com/events.php>

Everything same as above in events.php

<https://glipped.com/profile.php>

Besides causes and skills required, Organizational information should update as well in profile

<https://glipped.com/eventlist.php>

Description: This page has two tabs, the events created by the nonprofit and the proposals made by the nonprofit.

To be tested:

Every offering created by nonprofit should appear in events and every proposal created should appear in proposals tab

There are search filters on top which should be working as well

<https://glipped.com/nonprofit/index.php>

Description: This dashboard is where the nonprofit creates all its offerings and gets updates

To be tested:

Organisational information tab:

All details should be updatable and updating the nonprofit details in dashboard should update the nonprofit profile as well in the appropriate columns in nonprofit profile.

Offering Tab:

In the tab, adding an offering should make a public event and be displayed in events.php for everyone to see

Using the project proposal tab, a nonprofit can send a proposal directly to a single company. This should come in the notifications for the company as well as in the project proposal tab in the dashboard of the company.

The company can choose to accept or reject the proposal. Both of those updates come to the nonprofit in the Updates tab in the dashboard . If the company accepts, the nonprofit should be allowed to create the event for that company alone and would not be displayed in events.php.

Project updates:

After the event is done, if a KPI was ticked by nonprofit while creating the event, the nonprofit must get a reminder to fill it out.

After Login: VOLUNTEER ACCOUNT

<https://glipped.com/events.php>

Everything same as above in events.php

<https://glipped.com/profile.php>

To be tested:

Profile should have additional volunteer details updates including the company name which cannot be changed

The profile also has a user chart that shows the maximum causes and skills used by the employee as well as recently attended and upcoming events

https://glipped.com/create_event.php

To be tested:

Creating an event under the project of the company. Should display in events.php

<https://glipped.com/eventlist.php>

To be tested:

The created event should display here. The update and delete should work as well
